

The AGITO has been developed as the only fully modular dolly system capable of working free roaming. Combining AGITO Sports with our V-Con Pro or Tower and our Shotover G1 enables complete freedom of movement.

Perfect for use in the studio or on location, AGITO Sports offers a new way of moving a camera, with complete flexibility using our growing arsenal of modules and accessories, and an ease of operation not available with any other system.

The tower takes the AGITO to new heights by adding jib movement. With a stroke of 70cm the TOWER gives adjustable camera heights up to eye level. It can be remotely controlled by the MASTER through the use of foot pedals.

- Speeds of up to 25 km/h and as low as 1cm/sec
- Four wheel drive with independent adjustable suspension for all terrain use
- Encoded motor system for highly accurate movement
- Repeatable movements through the Master Controller
- 3 steering modes: '2 Wheel', '4 Wheel' and Crab
- Multiple wheel options available for increased flexibility: Monster, Dolly, Standard and Ice Wheels
- Combine with a wide range of existing remote camera heads
- Sports bundle comes in just 4 custom cases, weighing under 32kg each

SPECS

Max Speed	25 km/h (15.53 mph)
Total Car Length	0.95 m (3.12 ft)
Total Car Width	0.63 m (2.07 ft)
Vehicle Weight	43 kg (94.8 lbs)
Number Of Seats	0
On-Board Power	Yes
Fuel Motor	No
Electric Motor	Yes
Off-Road	Yes
Roll-Cage	No
Air Suspension	No
Hydraulic Suspension	No
Reinforced Roof	No
