

Introducing the TechnoCrane 10+, an advanced camera crane designed to create smooth and dynamic camera movements. While most telescopic cranes are very large in comparison, the TechnoCrane 10+ is small in size and therefore perfect for smaller sets. This means that the TechnoCrane 10+ opens the door to limitless creativity.

With a height range of 4.28m and a telescopic reach of 2.25m, the TechnoCrane 10+ is ideal for when you do not have room for a larger crane but want the stability and creative freedom of a telescopic crane.
